

SUPERSTALLATICO®

SOIL IMPROVER CATTLE AND HORSE MANURE FOR CERTIFIED ORGANIC FARMING

SUPERSTALLATICO is the modern and functional version of the **ripe manure** just like in the ancient peasants' tradition, keeping intact both its beneficial nutritional features and contents and fulvic and humic acids.

The bacterial flora, typical of humus, is preserved by low temperature dehydration which conveys the **micropellets** an **extremely reduced moisture ratio**. The product is free of salmonella and pathogenic germs.

SUPERSTALLATICO is used in place of the traditional manure spreading on soils, at a dose of 1500-2000 kgs/ha for all kinds of crops, with a 30% reduction of mineral fertilizers.

The full compliance of components and manufacturing process to current standards in organic farming enables the origin certification.

Packaging: 25-500 kg

Shape: Minipellets

Manufactured by

Approval Number:
Plant Vidor:
ABP1193UFERT2
Plant of Arquata del Tronto:
ABP1177UFERT2

Unimer S.p.A. - Via Paleocapa, 7 - 20121 Milano
COMPANY WITH SYSTEM CERTIFIED BY DNV
ISO 9001

SUPERSTALLATICO®

SOIL IMPROVER CATTLE AND HORSE MANURE

Minipellets

COMPOSITION	
Moisture	14%
Organic C	26%
Total Nitrogen	1%
C/N	26

FOR CERTIFIED ORGANIC FARMING

- **Raw materials:** Cattle and horse manure not from factory farming.

DOSES BY CROP		
CROP	DOSE Kg/ha	USE
Horticultural	1500-2500	During soil preparation pre-sowing/transplanting
Fruit trees	1500-2500	During autumn-spring
	2000-3500	Pre-transplanting
Strawberry	1500-2500	Pre-transplanting
Viticulture and olive trees	1000-2000	During the crop cycle in autumn or spring
	1500-2500	Pre-transplanting

Flower and ornamental crops and recreational lawns	1500-2500	At vegetative revival or pre-sowing/transplanting
Tobacco	1500-2500	During the last pre-transplanting operations
Corn and sorghum	1000-1500	During the last pre-sowing operations
Industrial, oil and protein crops	1000-1500	During the last pre-sowing operations
Wheat, rice and other cereals	1000-1500	During the last pre-sowing operations
Beetroot and alfalfa	1000-1500	During the last pre-sowing operations

Reference guidelines for individual crops are purely illustrative and are changeable, in relation to the needs, the fertility levels and the provisions of various regulations.

It is recommended to place the product slightly underground to enhance the nutritional efficacy.
