

ENDURANCE N6 LIGHT®

**NITROGEN ORGANIC FERTILIZER
BLEND OF NITROGEN ORGANIC FERTILIZERS**

FOR CERTIFIED ORGANIC FARMING

ENDURANCE N6 is a blend of organic nitrogen fertilizers, designed to achieve prolonged and complete nitrogen release. The organic nitrogen of protein source derives from meat meal, characterized by the presence of amino acids such as glycine, proline, alanine, acid glutamic and hydroxyproline, in addition to calcium phosphate.

These elements are gradually made available to the crop by the microbiome present in the humified organic component (dried horse, bovine and poultry manure).

Packaging: kg 25-500

Shape: Minipellets

Production Plants UNIMER S.p.A.

Via Salaria Km 145
63096 Arquata del Tronto (AP)
Approval Number
ABP1177UFERT2

Via Roma, 120
31020 Vidor (TV)
Approval Number
ABP1193UFERT2

Manufactured by

Unimer S.p.A. - Via Paleocapa, 7 - 20121 Milano
COMPANY WITH SYSTEM CERTIFIED BY DNV
ISO 9001

ENDURANCE N6 LIGHT®

NITROGEN ORGANIC FERTILIZER BLEND OF NITROGEN ORGANIC FERTILIZERS

COMPOSITION

Organic Nitrogen (N)	6%
Organic Carbon (C) of biological origin	24%

FOR CERTIFIED ORGANIC FARMING

- **Raw materials:** Meat meal, dried horse, cattle and poultry manure not from factory farming.

PRODUCED SOLELY FROM ORGANIC NITROGEN FERTILIZERS "ALLOWED IN ORGANIC FARMING."

DOSES BY CROP

CROP	DOSE Kg/ha	USE
Horticultural	600-1000	During soil preparation pre-sowing/transplanting or after transplanting operations
Fruit trees	600-1000	At the end of winter/spring
Viticulture and olive trees	600-800	At the end of winter/spring
Strawberry	600-1000	Pre-transplanting

Corn and sorghum	700-1000	During the last pre-sowing operations or after the crop emergence
Wheat, rice and other cereals	500-800	During the last pre-sowing operations or during the initial tillering phase
Industrial, oil and protein crops	400-600	During the last pre-sowing operations or after the crop emergence
Alfalfa	600-800	During soil preparation pre-sowing or at the end of winter
Tobacco	600-1000	During soil preparation pre-sowing/transplanting or after transplanting operations
Beetroot	600-1000	During the last pre-sowing operations or after the crop emergence
Flower and ornamental crops and recreational lawns	500-1000	At vegetative revival

Reference guidelines for individual crops are purely illustrative and are changeable, in relation to the needs, the fertility levels and the provisions of various regulations.

For organic and organo-mineral fertilizers it is recommended to place the product slightly underground to enhance the nutritional efficacy.

Organic fertilizers or soil improvers: For at least 21 days after their distribution on the ground it is forbidden to feed farm animals with herbaceous plants taken from pasture or after their harvest.

Contains at least 2% of components authorized by Reg. CE 1069/2009 that exclude its use as feed.
